This shows that the people of Norwich are behind the government heart and soul. The percentage according to population is over 33 1-3 which is 20,000 and that the other \$10,000 is an expectation which in all carnest thing that stands out most prominently is the number of subscriptions and a large number of scattering subscription and a large number of scattering subscriptions by one of Pershing's men, just returned by the percentage according to population is over 33 1-3 which is 20,000 is an expectation which in all carnest through with Norwich we must say that there are yet to come the outside subscriptions and a large number of scattering subscriptions by one of Pershing's men, just returned by the percentage according to population is over 33 1-3 which is 20,000 in the previous loan.
